AI Product / Technical Product

Founder-operator with 10+ years across consumer technology, fintech/rewards, product, technical systems, growth, partnerships, and operations. Built and led Rewards Bunny, a programmable rewards platform with 120,000+ registered users, 10,000+ merchants/brands, and US\$7M+ cumulative GMV. Strong at turning ambiguous business problems into product direction, technical requirements, launches, operating systems, and measurable outcomes.

CORE STRENGTHS

- AI product strategy and applied-AI workflow design
- Technical product management, APIs, integrations, and backend systems
- Consumer product, rewards, affiliate attribution, user journeys, and incentives
- Infrastructure, cloud migration, database operations, and production debugging
- Commercial judgment across users, merchants, vendors, revenue, GTM, and partnerships

PROFESSIONAL EXPERIENCE

Rewards Bunny — Founder & CEO

Singapore / Global | 2021-Present

Programmable rewards platform across cashback, affiliate attribution, merchant integrations, rewards infrastructure, and emerging AI-agent use cases.

- Founded and led Rewards Bunny from zero to 120,000+ registered users, 10,000+ merchants/brands, and US\$7M+ cumulative GMV across rewards and commerce use cases.
- Owned product strategy and execution across cashback, merchant discovery, affiliate tracking, reward rules, segmentation, payout workflows, partner integrations, user journeys, retention, and incentive design.
- Converted ambiguous business opportunities into product requirements, technical tradeoffs, launch plans, stakeholder coordination, and iterative product improvements.
- Worked across APIs, PHP/Laravel, MySQL/Percona, JavaScript/TypeScript, React, Docker, Linux, Nginx, Cloudflare, DNS/SSL, cloud infrastructure, backups, and production debugging.
- Planned and executed a GCP to Hetzner + CapRover + local database migration that reduced infrastructure costs by approximately 20x from a peak monthly cloud charge of US\$1,581.83 while preserving service continuity and database integrity.
- Explored AI-agent-ready product directions including MCP concepts, agent-readable documentation, structured prompts, workflow automation, and AI-assisted commerce operations.

PROFESSIONAL EXPERIENCE CONTINUED

VibeLaunch Framework — Creator & Maintainer

Open-source | 2026

Human + AI-agent launch workflow framework.

- Created an open-source framework for making software-launch workflows understandable and executable by both humans and AI agents.
- Designed reusable workflows using structured prompts, YAML checklists, launch audits, evidence requirements, release gates, hosting/deployment checks, security checks, and troubleshooting steps.

WhaleSave — Co-Founder & CTO

Singapore | Sep 2019-2021

Cashback product for gaming and digital purchases.

- Applied reward mechanics, gaming behaviour, segmentation, retention, and digital-commerce product thinking.

DinoMao — Co-Founder / CTO

Singapore | Oct 2018-2021

Singapore-developed digital claw-machine application.

- Worked across consumer product design, technical workflows, operations, customer experience, and ecosystem development.

GOshot — Co-Founder / COO

Singapore | May 2016-Sep 2019

Consumer-product startup.

- Operated across research, marketing, product positioning, media, partnerships, business development, and operations.

SELECTED PROJECTS AND EDUCATION

- Hotel No-Show Prediction: applied ML project using Python, pandas, NumPy, scikit-learn, preprocessing, feature engineering, classification, and model evaluation; 119,390 usable rows and Random Forest ROC AUC around 0.796.
- VibeLaunch repo/docs: github.com/JackyGohSG/vibelaunch-framework and jackygohsg.github.io/vibelaunch-framework/.

Ngee Ann Polytechnic — Diploma in Business Information Technology | 2007-2010

500 Startups / 500 Global Launch Batch 4 | Jan 2022-Jun 2022
