Founder's Office / Chief of Staff Tech / Strategic Projects

Founder-operator with 10+ years building and operating consumer technology, rewards, fintech, and AI-adjacent products across product, strategy, commercial execution, technical systems, partnerships, growth, and operations. Built Rewards Bunny to 120,000+ registered users, 10,000+ merchants/brands, and US\$7M+ cumulative GMV. Strong at taking ambiguous executive priorities, structuring the problem, aligning stakeholders, making tradeoffs, and driving execution through launch and iteration.

CORE STRENGTHS

- Turns ambiguous founder/CEO/CTO priorities into structured execution
- Bridges strategy, product, technical systems, partnerships, operations, and growth
- Brings founder-level accountability, commercial judgment, and resourcefulness
- Understands AI, automation, and technical systems without losing sight of business outcomes
- Can operate independently across special projects, zero-to-one initiatives, launches, and process fixes

PROFESSIONAL EXPERIENCE

Rewards Bunny — Founder & CEO

Singapore / Global | 2021-Present

Programmable rewards platform spanning cashback, commerce, affiliate attribution, merchant integrations, partner workflows, rewards infrastructure, and AI-agent use cases.

- Founded and led Rewards Bunny, growing the platform to 120,000+ registered users, 10,000+ merchants/brands, and US\$7M+ cumulative GMV.
- Owned company strategy, product direction, partnerships, business development, growth, customer operations, vendor relationships, technical systems, payout workflows, communications, advisers, contractors, and investor-facing priorities.
- Drove execution from ambiguous problem framing through research, strategy, requirements, product decisions, technical coordination, launch, troubleshooting, and iteration.
- Built operating knowledge across users, merchants, affiliate networks, incentive structures, monetisation, retention, partner integrations, payout operations, and platform reliability.
- Planned and executed a GCP to Hetzner + CapRover + local database migration, reducing infrastructure costs by approximately 20x from a peak monthly cloud charge of US\$1,581.83 while protecting continuity, backups, DNS/SSL cutover, and operational stability.
- Managed ambiguity across commercial priorities, product feasibility, technical limitations, user experience, revenue opportunities, support issues, and partner expectations.

PROFESSIONAL EXPERIENCE CONTINUED

VibeLaunch Framework — Creator & Maintainer

Open-source | 2026

Workflow framework for reliable launches by humans and AI agents.

- Created a framework using structured prompts, reusable checklists, release gates, evidence requirements, launch audits, deployment checks, security considerations, and troubleshooting flows.
- Demonstrates ability to turn messy operational knowledge into reusable systems, process clarity, and AI-agent-compatible execution standards.

500 Startups / 500 Global — Global Launch Batch 4

Jan 2022-Jun 2022

Startup programme.

- Exposure to international startup scaling, venture-backed operating rhythm, and founder peer network.

WhaleSave — Co-Founder & CTO

Singapore | Sep 2019-2021

Cashback platform for gaming and digital purchases.

- Covered product strategy, reward mechanics, consumer behaviour, retention, segmentation, and technical workflows.

GOshot — Co-Founder / COO

Singapore | May 2016-Sep 2019

Consumer-product startup.

- Worked across research, market positioning, growth, partnerships, media, business development, and operations.

SELECTED PROJECTS AND EDUCATION

- Selected strengths: ambiguous project ownership, commercial judgment, product + technical bridge, cost/operational discipline, and applied AI awareness.
- Earlier experience includes J Consultancy Group, business growth consulting; Ngee Ann Polytechnic, Diploma in Business Information Technology.

Ngee Ann Polytechnic — Diploma in Business Information Technology | 2007-2010

500 Startups / 500 Global Launch Batch 4 | Jan 2022-Jun 2022
